

WELT ELECTRONIC

Founded in 1985, we are a company specialized in the sales, marketing, and distribution of both standard and custom electronic and lighting components.

Thanks to the support and collaboration with various top Brands, we have a portfolio of products capable of satisfying the expectations and requirements of an increasingly demanding market.

With an in-house Industrial Division and Lighting Division, our aim is to provide our customers with a vast range of products, services, and solutions.

*Founders:
R. Rabatti, G. Marotta, P. Dho*

Custom Products

We guarantee maximum satisfaction to all our customers, introducing them to the technology most suited to their individual needs, while constructing a 'custom-made' solution together.

Partnership

The very best ideas arise from a merging of various areas of expertise. Solid partnerships allow us to transform images into facts, demands into solutions, and intuitions into products.

Customer Care

Providing the very best assistance before, during, and after every purchase, while taking meticulous care with each shipment, even after all orders have been fully processed, is just one of the advantages we offer our customers.
